

TenderLens

Procurement Deck

The Work Behind Every Tender

Every tender brings the same questions
Finding these answers across portals, documents, and teams takes time.

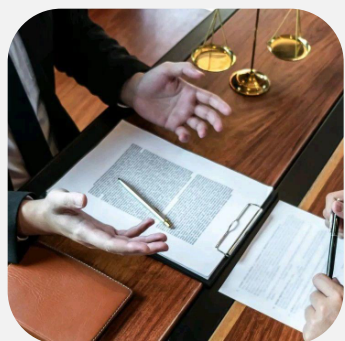

Which opportunities match our
business?

Do we meet the eligibility
requirements?

Which conditions could affect
our costs or payment?

What documents do we need
to submit?

Who is responsible for
completing each task?

How TenderLens Helps

Less searching through portals and files. Clearer requirements and team responsibilities. Your team makes the decisions. TenderLens brings the information together.

01

Discover

Find tenders that match your business.

02

Qualify

Check eligibility and decide whether to bid.

03

Analyze

Review requirements, commercial risks, and line items.

04

Prepare

Organize documents and coordinate work before submission.

TenderDiscovery

Tenders that match your business
FuturixAI monitors tender sources and surfaces opportunities
based on your company profile.

Sector and geography

Relevant project experience

Certifications and capabilities

What You Get:
A Shortlist Of Opportunities
For Your Team To Evaluate.

Eligibility And Bid Decisions

Eligibility checks before bid preparation
Compare tender requirements with your company's qualifications.

What is checked

03

Manage deadlines and pending tasks

04

Review compliance before submission

One Tender, **Explained**

What your team sees before deciding to bid

Opportunity
The tender matches your sector and location.

Eligibility
Project experience meets requirements. Financial evidence needs review.

Risk
Payment depends on an acceptance condition that needs clarification.

Preparation
Supporting documents and responsibilities are listed for the team.

Decision
Resolve the open issues before committing further bid effort.

Why FuturixAI

A comparison with standalone tender document analysis tools

	Others	TenderLens
Tender coverage	Analysis of uploaded documents.	Discovery, qualification, analysis, and bid preparation.
Decision support	Document summaries and answers.	Evaluation against your company profile, with evidence to review.
Next steps	Findings for the user to take forward.	Findings connected to document preparation and team responsibilities.
Company knowledge	Reference material supplied for the analysis.	A reusable library of company evidence and approved responses.

Faster Bid Decisions

Bid decisions moved from 3–5 days to the same working day

The situation before

A pipeline of 40+ active tenders, with manual portal screening and reactive reviews.

With tenderLens

Scored opportunities and structured recommendations helped the team decide which bids to pursue within the same working day.

Bid decisions were took

Same Day

Before

Bid decisions took

3 to 5 days.

With TenderLens

IT Services

Commercial risks visible before commitment

An IT services firm used FuturixAI to review bid risks and prepare its submission.

With TenderLens

- Source-Linked Clauses Brought Commercial Risks Into View.
- Reusable Content Supported Bid Preparation.
- Mandatory Document Checks Supported The Submission Review.

The outcome

The team could review risks before commitment and prepare its submission with clearer supporting information.

The Challenge
Payment Conditions, Delay
Penalties, Arbitration Terms, And
Other Commitments Were Difficult
To Review Together.
